

Technical Data Sheet TSP Spinner

To produce hollow figures like balls, vials, half-shells, etc. with non-porous, uniform wall thickness.

Magnetic mounting system for a wide variety of shape sizes up to 500 x 500 mm.

Wide range of applications.

Characteristics

- 1. Two rotating drums with 6 rotating arms each (12 rotating elements in total)
- 1. Permanent magnetic fixtures (2 mould frames per arm = 24 mould frames)
- 1. Machine housing in glass bead blasted stainless steel
- 1. Rotor rotation speed and rotary element speed infinitely variable
- 1. Safety slipper clutch for safe operation
- 1. No lubrication necessary (dry) > maintenance-free
- 1. Electromagnetic vibration with adjustable intensity (wear-free, as non-contact)
- 1. Air suspension -> no vibration to the ground

Applications

- Hollow figures
- Hollow balls
