

Technical Data Sheet TVT Vibration Table

Vibrating tables are designed to eliminate air bubbles in freshly poured moulds. This helps the mass settle evenly into the moulds, ensuring a smooth and professional finish on the surface.

	750	750	1000	1500	1000	1500
Belt Transport	Nein			Ja		
Mold width	275 ... 380		275 ... 500		501 ... 650	
Weight	250 kg	300 kg	450 kg	450 kg	450 kg	450 kg

Characteristics

- High-efficiency Vibration table
- Very quiet and without noise protection cover
- Makrolon cover to see the products during vibrations (TVT 1000, TVT 1500)
- Control possible via touch screen of depositor (synchronized and individual - depending on the product)
- Easy cleaning possible
- No lubrication required

Options

- Side vibration
 - without (Default and sufficient for many products)
 - magnetic (high frequent, distributes inclusions better)
 - pneumatic (even better for solid and one-shot products)
- Bottom vibration
 - Unbalance (Default, and optimizes distribution for solid and one-shot products)
 - Electromagnetic (ideal for decor products)
 - Combined (suitable for laboratories)
- Book mould-Side guide

Applications

- Bars
- Pralines
- Hollow figures
- Decorations
- Macarons
- ...
